

All Age Neurodevelopment Review

One of the key elements in the **All Age Neurodevelopment Review** project is understanding what current services look and feel like in Dorset.

Project Approach

The project is undertaking a co-production approach to develop plans for the new all age pathway. The objectives of the project are:

- To reduce the referral to diagnostic waiting time
- To support the long-term plan target of reducing specialist inpatient provision
- To increase the support and training for local providers to be able to support people
- Ensure timely post assessment support including crisis and home treatment interventions
- Ensure that children and young people nearing adulthood are able to access ongoing support based on their level of need
- To increase the number of people who maintain their own local accommodation because their housing and support services meet their needs

The 'Our Dorset' approach is to work in partnership with people in Dorset. These are people who work in our health and local authority services and are part of our local communities. We will work in partnership through the project approach.
